

Warranty Policy

Sample/Demo Policy Notice

This warranty policy is synthetic content created for retrieval testing and customer support demonstrations.

Coverage Period

Products are covered for 12 months from the delivery date. The warranty window is based on the confirmed delivery date associated with the customer's order.

Covered Items

The warranty covers manufacturing defects, hardware failures that occur under normal use, and defective accessories included with the original shipment.

Items Not Covered

The warranty does not cover accidental damage, misuse, water damage, unauthorized repairs, or normal wear and tear from regular product use.

Required Proof

Customers must provide the order number, purchase date, and product photos if the item is damaged or visibly defective. Support may request additional photos when the product condition is unclear.

Resolution Options

After inspection, eligible claims may be resolved with a repair, replacement, or store credit. The final resolution depends on the inspection result, available inventory, and the nature of the defect.

Support Process

Customers should contact support and provide their order details, a description of the issue, and any available evidence. Support should confirm that the request matches the warranty policy before offering a resolution.

Support Executive Next Step

Verify the purchase date, warranty window, product condition, and submitted evidence. If the claim appears eligible, route it for inspection and prepare the appropriate repair, replacement, or store credit option.
